

LEAD WALK 2022

The Chenango County Department of Health will be visiting your town to educate the community on the importance of [Lead Testing and Lead Poisoning.](#)

On October 1, 2019 NYS Public Health Law changed the definition of an elevated blood level in children to a lower amount. Studies show that NO amount of lead exposure is safe for children. We will include information on these changes. We will also include information about **RABIES PREVENTION.**

This Year's theme is: *NO Level of Lead is SAFE*

Staff will be leaving this information at each residence in your town or village during the months of May and June 2022 at your front door. We will be using pedometers to check our steps and try to pass the **200** mile mark as a team.

Look for gray doorknob hangers on your front door to access the educational information. If you have any questions you may call us at 337-1660. We are located at the County Office Building, 5 Court Street, Norwich NY 13815.

Check Your Steps!

Walking Goal 200 Miles!
